ARCHANA P

SOC Analyst (Fresher)

archana.p2442@gmail.com | +91 9778562319 | LinkedIn | GitHub | Portfolio | Malappuram, India

PROFESSIONAL SUMMARY

Cybersecurity fresher with hands-on experience in SOC operations, SIEM monitoring (Splunk, Wazuh), log analysis, and incident response through labs and training. Skilled in threat detection, MITRE ATT&CK mapping, and handling security events across Windows and Linux environments. Seeking an entry-level SOC Analyst role to apply and enhance practical skills.

EDUCATION

Bachelor of Computer Science 2022 - 2025
University of Calicut, Majlis Arts and Science College

SKILLS

SOC: Security Monitoring & Log Analysis, Incident Detection, Incident Response, Vulnerability Assessment, Threat Analysis
Tools: Splunk, Wazuh, Wireshark, Snort, Suricata, Burp Suite, Nmap, Metasploit
Networking: Network Traffic Analysis, OSI model, Firewall, TCP/IP, Networking Protocols, IDS/IPS
Soft Skill: Adaptability, Teamwork, Communication skills, Problem Solving

PROJECTS

AI-Assisted SOC Alert Automation - Splunk, n8n, Ollama

- Created a SOC alert workflow in Splunk to detect RDP brute-force login attempts from Windows logs; helped reduce false alerts and automated basic alert handling using n8n.

Threat Detection & Log Analysis - Wazuh SIEM

- Deployed Wazuh SIEM across Windows and Linux endpoints for centralized log analysis; conducted severity assessment and assisted in containment of 15+ simulated attack scenarios (RDP/SSH brute-force, File Integrity Monitoring, malware) using IOC-based analysis, and documented investigation findings.
- Developed and tested SIEM correlation rules to detect suspicious activities and improve alert accuracy during simulated attack scenarios.

COURSES / TRAINING

Cyber Security Trainee - Offenso Hackers Academy 07/2025 - 01/2026

- Gained practical experience in Security Operations Center (SOC) workflows including monitoring and incident handling
- Performed threat detection, alert triage, and incident response using tools like Splunk, Wireshark.
- Conducted vulnerability assessments and network traffic analysis with exposure to real-time cyberattack simulations.

TryHackMe SOC Training Labs 04/2025 - Present

- Completed 50+ SOC-focused labs covering alert triage, SIEM log analysis, MITRE ATT&CK threat mapping, incident containment procedures, and Linux privilege escalation - achieving Top 15% platform ranking.
